

Crusher

After the spike teeth crumbles the side wall, a $\frac{3}{4}$ " wide flat surface between the teeth presses soil tighter around seed better than competitive products that have a beveled edge or raised center section, which allows soil to "blow up" above the seed, rather than pressing tightly against seed. Reducing, if not eliminating air pockets. We have seen as much as 1 day earlier spike thru when compared to other spike wheel systems.

Lightweight (9.5 lbs) cast fCrusher Closing Wheel. Tapered tooth design allows firming on one side and crumbling on the other. Drafted tooth keeps its entire foot print on the ground. No more wearing one side of plastic until it has to be flipped. Long life ductile cast iron will run for years. Martin Duty with PEER Seed Extreme 6 lip seal bearing.

Out lasts competitive products by years!
