

# Crumbler

**A new option for our 2nd stage closer, or a  
factory two stage closer!**

**The fCrumbler mulches and firms the seed  
trench without smearing or packing like  
a rubber press wheel. Properly spaced  
cleats, size material while leaving a mulched  
surface, which reduces crusting. Cleat  
design also prevents mud build up from wet  
conditions or fertilizer application that are  
common with a solid rubber wheel.**

**Martin Duty, with PEER Seed Extreme 6 lip  
seal bearing.**

**Close the furrow with the best.**

**Elkton, KY 42220**
